

Wholesale Voice, SMS & Mobile Numbers

A licensed Dutch MVNE and GSMA member,
serving telecom operators, service providers, MVNOs,
ISPs and messaging operators worldwide.

Public Mobility

- ✓ Public Mobility is a GSMA member and licensed carrier based in the Netherlands, with 15 years of experience in telecom.
- ✓ We provide end-to-end wholesale solutions across voice, messaging and numbering, helping partners extend reliable connectivity into new and underserved markets and unlock new revenue.
- ✓ Where most global wholesalers offer broad but generic coverage, we combine that reach with something few of them have: our numbers and MNO interconnects in the Netherlands and Belgium.
- ✓ One partner for numbers, SMS and voice, with clean routes, honest pricing, and people who actually pick up the phone.

What we offer

✓ Mobile Numbers: NL & BE

Direct-sourced Dutch (+31) and Belgian (+32) mobile numbers via our own MNO interconnects, not resold through intermediate aggregators.

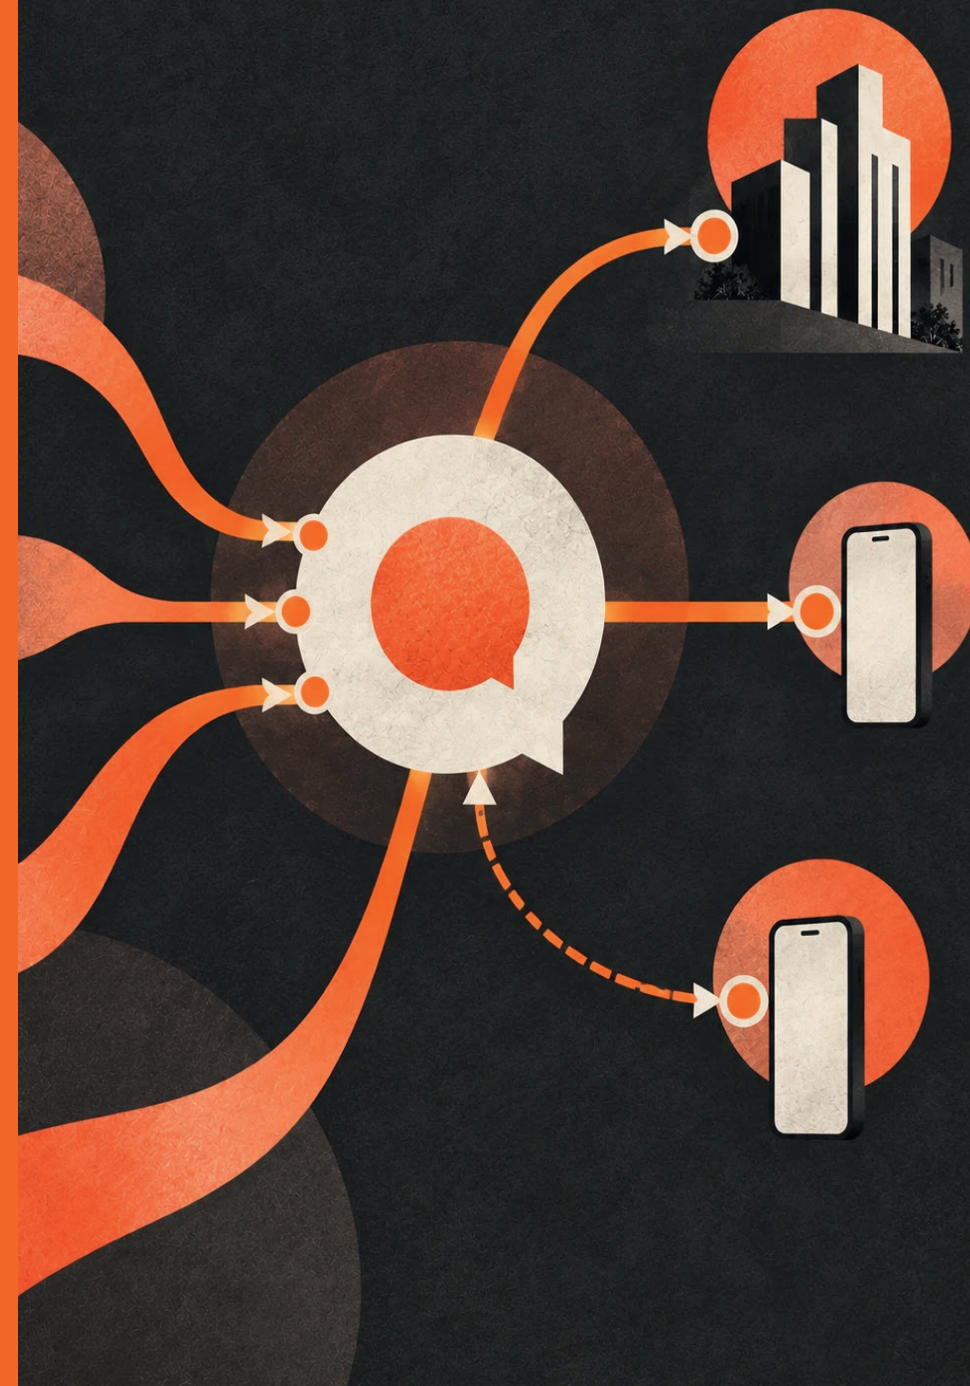

Fast provisioning and portability, with numbers well suited for OTP and verification use cases that need a genuine local presence.

Global SMS: A2P, P2P & P2A

GSMA Certified SMS Hub and MEF member, supporting A2P, P2P, P2A, two-way and enterprise messaging, plus WhatsApp and Viber channels, and well suited for bulk messaging.

Direct routes to MNOs or through a single trusted hop, with delivery rates up to 96 percent and GDPR-compliant infrastructure throughout.

Wholesale Voice Termination

A Tier-1 voice carrier with direct interconnects to mobile operators, PTTs and Tier-1 partners in 120+ destinations, extending to wholesale coverage across 190+ countries with full DTMF and fax support.

Premium CLI routes, real-time quality monitoring, anti-fraud protection, and flexible prepaid or postpaid billing.

Why partner with Public Mobility

- **Licensed and GSMA-affiliated:**
an established, compliant Dutch carrier, not an anonymous reseller.
- **Direct NL/BE interconnects:**
the one lane most global wholesalers can't offer natively.
- **A real team, not a ticket queue:**
15 years of experience and a dedicated customer success manager for every partner, backed by 24/7 support.
- **EU-based data handling:**
GDPR-compliant infrastructure with data kept local and regulations observed by market, relevant for partners serving finance, fintech and healthcare.
- **Fast integration:**
API and SMPP access, with onboarding measured in days rather than weeks.
- **Transparent, flexible pricing:**
clear rates, prepaid or postpaid, no hidden fees.
